

Exmed

This new one-day course is designed for Basic and Intermediate EMS providers and other medical professionals who may be required to manage a patient's airway before transport to a hospital.

The course is taught by our national EMS Airway Faculty--all of whom perform airway management regularly in their clinical practices and are exceptional educators.

Gain Critical Airway Knowledge and Skills

- **Airway Anatomy**
- **Techniques for opening the airway**
- **Proper BVM techniques**
- **Sellick's Maneuver and BURP**
- **How and when to use extraglottic devices**
- **Assisting with intubation**

"Every person who touches a patient's airway can make a huge difference in the patient's outcome. Opening the airway and facilitating gas exchange are absolutely critical steps to successful airway management."

Michael F. Murphy, MD
National Course Director
Fundamentals of Airway Management &
The Difficult Airway Course: EMS.

This continuing education is approved by the **Continuing Education Coordinating Board for Emergency Medical Services (CECBEMS)**. CECBEMS Activity #10-CECB-F2-1060. CEH Number and Type: 6.75 Basic.
